

100.000 signatures for 100 reasons

Erdoğan and the AKP should be prosecuted for their feminicidal policies!

As the Kurdish Women's Movement in Europe (TJK-E) we want to expose and draw attention to the feminicidal policies of the AKP with this campaign. We want to seek justice and demand a prosecution of Erdoğan. With this effort, we want to be the voice for all women in the world, who are subjected to violence and draw attention to all state crimes committed against women. We want to put an end to the violence against women committed in the Turkish Republic on a feminicidal scale, where one woman is killed by male violence every day.

On October 29, 2009, 12 year-old Ceylan was killed by a Turkish army howitzer, while pasturing sheep. On January 9th, 2013, Sakine Cansız, Fidan Doğan, and Leyla Şaylemez were assassinated in Paris by the Turkish intelligence. Kader Ortakaya was shot in the head in November 2014, while trying to cross into Kobane during the siege of Daesh. Young activist Dilek Doğan was assassinated in her house by the police on October 18th 2015. In December 2015, the dead body of Taybet Inan, a civilian killed by the Turkish armed forces, was left to rot in the streets during the curfew in Silopi. On January 4th, 2016, Kurdish women's activists Seve Demir, Pakize Nayır, and Fatma Uyar were massacred by army fire in Silopi under army siege. On October 12, 2019, Kurdish women's activist and politician Hevrin Xelef was murdered by Turkish-backed Islamist forces in the Turkish state's 'Peace Spring' Operation in Serekaniye (Ras al-Ain) in Northern Syria. In June 2020, three Kurdish women activists of the umbrella women's movement Kongreya Star were murdered in a Turkish drone strike on a house in the Helince village of Kobane, Northern Syria. There are many more examples.

We want to collect 100.000 signatures for 100 reasons to oppose the dictator and his mercenaries in their use law, military and the police for violence and injustice. The signatures that we will collect will constitute the first step towards laying the foundations for the legal, social, political and action-based works that we will engage in, in our quest to prosecute the dictator. We will take our signatures and the incidents we logged, and all the evidence we collected to the UN and other relevant institutions to demand the beginning of the process of recognizing femicide as a crime similar to genocide.

Each signature we collect will take us one step closer to justice. You can add power to our power, your voice to our voice to remove the dictator from our life by taking place in this campaign with your signature below! You can also sign directly at www.100-reasons.org/petition or sending an e-mail to signatures@100-reasons.org

I want to support the campaign 100 Reasons To Prosecute The Dictator and want to get informed about new developments:
